

Ask GA-EPD: tell everyone when anyone spills

BEGIN_DATE	END_DATE	COUNTY	CITY	OVERFLOW_LOCATION	QUANTITY	Annual total
2018-08-13	2018-08-13	Lowndes	Valdosta	1638 New Statenville Hwy - Mud Creek WPCP - Vald	135000	448425
2018-07-06	2018-07-06	Lowndes	Valdosta	Val-Tech Road - Lowndes County	9300	
2018-06-26	2018-06-26	Lowndes	Valdosta	Withlacoochee WWTP - Valdosta	300000

2017-01-22	2017-01-25	Lowndes	Valdosta	3180 Wetherington Lane - Valdosta	220000

I asked Valdosta for this list for years

Finally got it from GA-EPD.

Things are getting better.

But we never would have known

Without this EPD data.

And still there are spills.

Some Valdosta and Lowndes County did not tell us about....

750,000 gallons, clarifier, Flint River watershed

Call to EPD on 10/27/2018. Sent email later, same day.

Notification letter sent on 10/31/2018.

Letter says that during a scheduled annual mill outage, while a repair to seal water line was being made, an incomplete isolation allowed water from the mill water clarifier to back-flow to Flint River through intake piping and to the river. Mill water clarifier contains water from river and treatment chemicals.

Chemicals are sodium hydroxide, drewflow (polymer), coagulant, millisperse (corrosion inhibitor).

Chemical feed was stopped, prior to release, due to the water outage.

Once spill identified, valve at the clarifier was closed completely.

Once mill outage is completed, incident will be evaluated further to put measures in place to prevent a recurrence of such releases in future mill outages.

Why not publish the spreadsheet daily, EPD?

A Resolution

Requesting the Georgia

Environmental Protection Division

to Timely Publish Pollution Spill Reports

WHEREAS, clean water is a basic right of all Georgia citizens and a basic mission of the Georgia Water Coalition and all its partners; and

WHEREAS, pollution spills unknown to the public could represent public health hazards; and

WHEREAS, pollution spills unknown to the public cannot trigger further water quality monitoring by entities such as Georgia Water Coalition partners to detect public health hazards and other potential effects; and

Florida does it

No sewage spills in many months
In the Suwannee River Basin in Florida.

But a Sabal Trail pipeline leak.
We only know about that because of
Florida's daily Notices of Pollution.

Has Sabal Trail leaked in Albany, GA?

Costs you nothing; commits you to nothing

Request GA-EPD to publish spill reports Page 2 of 3 online same day received in Atlanta

NOW, THEREFORE, BE IT RESOLVED that the undersigned organizations request the Georgia Environmental Protection Division:

1. To publish spill reports the same day it receives them, online, on its website, in a spreadsheet, and;
2. To provide online email signup for receipt of alerts of spills the same day they occur, and;
3. To consider, without delaying 1 and 2 above, adding an online interactive map of recent spills..

PASSED AND ADOPTED BY THE UNDERSIGNED ORGANIZATIONS, this 29th day of October 2018 or on a date as noted by an individual signature.

GA-EPD did answer on November 2, 2018

John – good idea. We will get to work immediately on the logistics to see how we can make this happen. I'll keep you informed of our progress.

Rick Dunn
EPD

Can't hurt to continue encouraging him until we see Daily spill reports on the GA-EPD website.
