E3 Solutions Enhanced Wastewater Evaporation Systems Brochure

ENHANCED WASTEWATER EVAPORATION SYSTEMS

APPLICATIONS

Oil and Gas • Mining
Landfill Leachate • Power Plant
WWT • Storm and Flood Water
Food and Beverage • Reverse Osmosis
And More

MAXIMIZE EFFICIENCY | MINIMIZE WASTEWATER

**RETURNING PURE WATER VAPOR BACK INTO
THE HYDROLOGIC CYCLE**

evaporationworks.com

EVAPORATORS DESIGNED TO LAST AND PERFORM

Capable of evaporating wastewater with the highest and lowest pH, and challenging levels of TSS and TDS.

APPLICATION CAPABILITY

- ✓ Adjustable droplet size and overspray control
- ✓ 360° rotational atomizing arm
- ✓ Variable droplet size spectra, 70 - 125 micron average
- ✓ Atomizer speeds up to 15,000 RPM
- ✓ Safe servicing platform

THE HIGHEST SPEED TO HORSEPOWER ATOMIZER ON THE MARKET PROVEN INDUSTRY BEST EVAPORATION RATES

VARIMAX 20

Maximum Throughput Capacity
20 GPM | 4.5 m³/h

Electric consumption | 3 kW/h

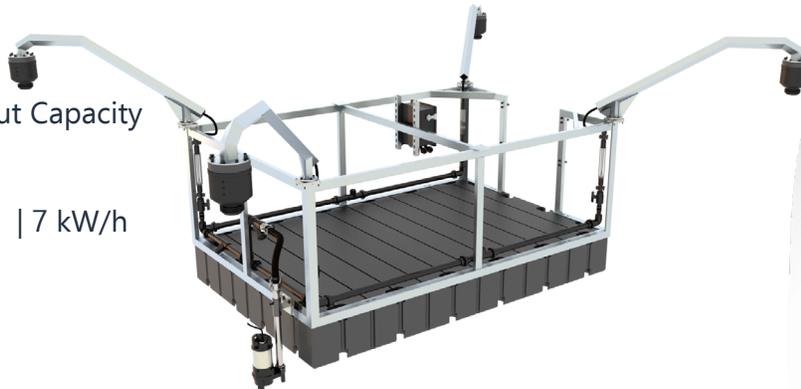

The Varimax 20 is expandable to a Varimax 40.

VARIMAX 40

Maximum Throughput Capacity
40 GPM | 9 m³/h

Electric consumption | 7 kW/h

Depending on the weather conditions, one Varimax 40 unit can evaporate over 600 barrels of wastewater per day.

Customer's Testimonial

E3's evaporation equipment easily met all our performance requirements keeping us in compliance with Florida's environmental disposal regulations.

Michael S.
Florida Governmental Utility Authority

Customer's Testimonial

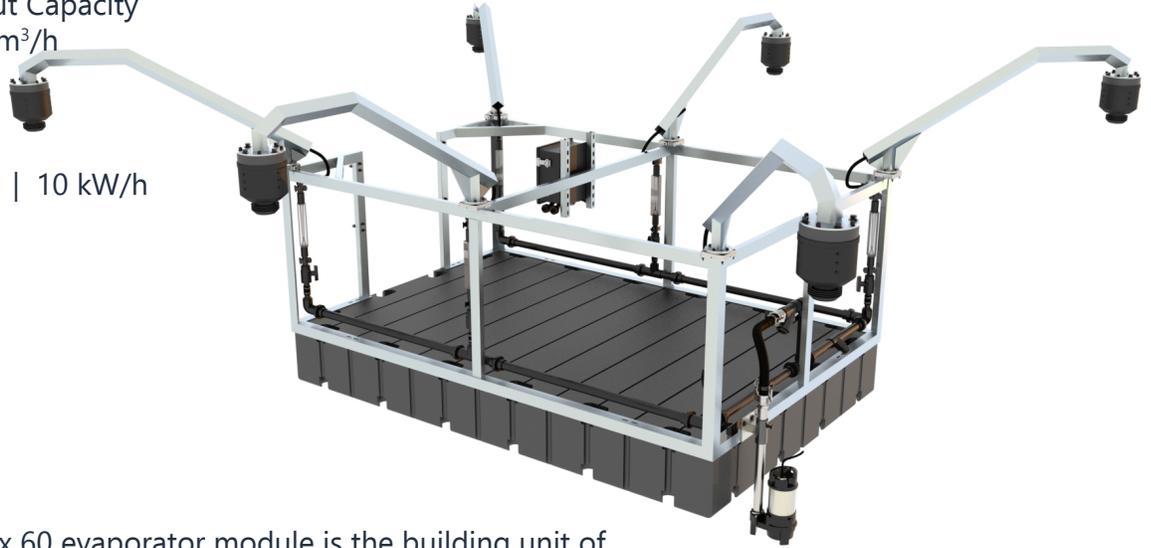

E3's Varimax-20 provided immediate results that quickly led us to purchase an additional three Varimax-40 units... we proudly recommend E3 Solutions LLC without hesitation.

Mike D.
IWS Energy Services

VARIMAX 60

Maximum Throughput Capacity
Up to 60 GPM | 13.5 m³/h

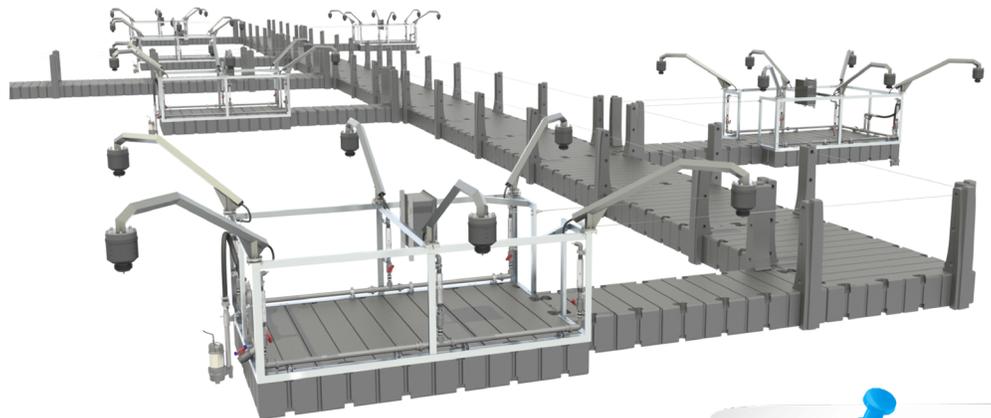

Electric consumption | 10 kW/h

The Varimax 60 evaporator module is the building unit of E3's MegaMist 360 and MegaMist+ evaporators.

MEGAMIST 360 & MEGAMIST +

Customizable Throughput Capacity
starting at 360 GPM to
over 10,000 GPM

The MegaMist+ has the industry best micron-droplet spectra to dry-air mix ratio Vs competitive equipment.

[Watch the MegaMist+ in operation.](#)

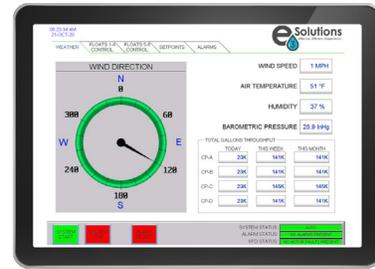

Environmental Control Interface (ECI)

Allows additional weather control and programming capabilities to match E3's Evaporation Systems to the local conditions, alleviate overspray, and increase evaporation in real-time.

State-of-the-art Weather Station

HMI 15" LCD Interface

ECI's real-time functions:

- Site Specific Set Points
- Water Throughput Totalizer
- Remote Access
- Optional Remote Camera
- Downloadable Stats
- Wind Speed & Direction
- Relative Humidity
- Air Temperature
- Barometric Pressure
