Surveying and Engineering Services Agreement: Knight's Creek Trunk Line Evaluation

November 21, 2024

Ben O'Dowd, PE
 Director/City Engineer
 City of Valdosta
 300 North Lee Street
 Valdosta, GA 31602

Mr. O'Dowd,

LEA is pleased to present this proposal to provide engineering services for the evaluation of a portion of the Knight's Creek trunk line from manhole M196 to the Mud Creek Plant. The evaluation will include CCTV inspection with Sonar of 14,200 LF of 21" DIP and 50 level two manhole inspections. Many portions of the route to be inspected are in remote areas to which access has been impaired or blocked by recent storms. The City will be responsible for providing physical, safe, and legal access to all manholes along the route. The City will be responsible for opening any sealed, vented, or other non-standard manholes to facilitate inspections. In the unlikely event that equipment gets lodged in the collection system through no fault from our crews, the City will provide excavation services to retrieve the equipment within 48 hours. Bypass pumping is not anticipated, but if it becomes necessary to complete the project, the rate will be negotiated on a case-by-case basis and agreed upon by the City and LEA.

LEA and our subcontractor will provide the following deliverables for this project:

1. Pipeline Assessment Certification Program (PACP) database with CCTV inspection videos (PACP Coded)
2. Manhole Assessment Certification Program (MACP) database with photographs.
3. PACP pipe rating index & PACP/MACP coding information.
4. Inspection reports in PDF format and organized by line segment.

All work will be completed in accordance with City of Valdosta standards and specifications. We appreciate this opportunity. Please call me at 229.253.0900 should you have questions or require additional information.

Sincerely,

Clayton Milligan, PE
 Executive Vice-President

Contract Amount: \$167,000
