

# OR-TEC

Water. Works.

est.1980

Thanks for allowing us to present you with this proposal. OR-TEC's goal is to provide high quality screening products and service. With that in mind

- Our systems are fully tested prior to leaving our factory
- Our frames, unit bodies, tanks, covers and fasteners are manufactured from stainless steel
- The motors and geardrives we use are of the highest quality and designed for wastewater's harsh conditions
- We can supply all the equipment required for a complete screening package and we support all equipment we sell for life
- We offer free phone service for operational questions, maintenance issues and troubleshooting for the life of the equipment.
- We ensure the plant operators are 100% supported and are confident their unit is always fully optimized and trouble free.

We hope this proposal is helpful and are confident if you chose the OR-TEC Micro Bar Screen for your screening needs you will be completely satisfied in your decision. If you have any questions or require more information, please let me know.

Regards,

*Jim O'Leary*
