

Summary Page

Name of Facility: Quitman Water Pollution Control Plant (WPCP)

LAS Permit No.: GAJ020022

This is a reissuance of an LAS permit for Quitman WPCP. The facility land applies treated domestic wastewater to a dedicated site in Brooks County. The draft permit was issued on XXXXXXXX XX, 2025 and the public comment period ended on XXXXXXXX XX, 2025.

Please Note The Following Changes to the Proposed LAS Permit From The Existing Permit:

Part I.B.2 – Storage Pond Limitations and Monitoring Requirements

- Updated monitoring frequencies for nitrate and total Kjeldahl nitrogen to one day per month to be consistent with current monitoring frequencies at municipal LAS facilities.
- Updated monitoring frequency for pH to two days per month to be consistent with current monitoring frequencies at municipal LAS facilities.

Part I.B.3 – Groundwater Monitoring

- Replaced fecal coliform bacteria for *Escherichia coli* monitoring to comply with the Safe Drinking Water Rules and Regulations.
- Updated monitoring frequencies for nitrate, pH, and specific conductivity to one day per month to be consistent with current monitoring frequencies at municipal LAS facilities.
- Updated monitoring frequency for *Escherichia coli* to one day per quarter to be consistent with current monitoring frequencies at municipal LAS facilities.

Standard Conditions and Boilerplate Modifications:

The permit boilerplate includes modified language or added language consistent with current LAS permits.

Final Permit Determinations and Public Comments:

- ☐ Final issued permit did not change from the draft permit placed on public notice.
- ☐ Public comments were received during public notice period.
- ☐ Public hearing was held on
- ☐ Final permit includes changes from the draft permit placed on public notice. See attached permit revisions and/or permit fact sheet revision.
