

B.3. INSTREAM SURFACE WATER QUALITY MONITORING

New River:

The receiving stream shall be monitored by the permittee as specified below for 12 months after permit effective date:

Parameters	Instream Surface Water Quality Monitoring	Monitoring Requirements		
		Measurement Frequency	Sample Type	Sample Location ⁽¹⁾
Total Hardness, as CaCO ₃ ⁽²⁾	Report	See Below	Grab	Downstream

⁽¹⁾ Downstream sampling location refers to the crossing of New River with Lower Brookfield Road (31.414015, -83.442972).

⁽²⁾ Stream samples for Total Hardness must be taken concurrently with effluent samples for total recoverable copper and total recoverable zinc.
Refer to Part I.C.9. TOTAL RECOVERABLE COPPER, TOTAL RECOVERABLE ZINC AND TOTAL HARDNESS MONITORING.
