

C.     MONITORING AND REPORTING

1.     REPRESENTATIVE SAMPLING

Samples and measurements of the monitored waste shall represent the volume and nature of the waste stream. The permittee shall maintain a written sampling and monitoring schedule.

2.     SAMPLING PERIOD

- a.     Unless otherwise specified in this permit, quarterly samples shall be taken during the periods January-March, April-June, July-September, and October-December.
- b.     Unless otherwise specified in this permit, semiannual samples shall be taken during the periods January-June and July-December.
- c.     Unless otherwise specified in this permit, annual samples shall be taken during the period of January-December.

3.     MONITORING PROCEDURES

All analytical methods, sample containers, sample preservation techniques, and sample holding times must be consistent with the techniques and methods listed in 40 CFR Part 136. The analytical method used shall be sufficiently sensitive. EPA-approved methods must be applicable to the concentration ranges of the NPDES permit samples.

4.     RECORDING OF RESULTS

For each required parameter analyzed, the permittee shall record:

- a.     The exact place, date, and time of sampling, and the person(s) collecting the sample. For flow proportioned composite samples, this shall include the instantaneous flow and the corresponding volume of each sample aliquot, and other information relevant to document flow proportioning of composite samples;
- b.     The dates and times the analyses were performed;
- c.     The person(s) who performed the analyses;
- d.     The analytical procedures or methods used; and
- e.     The results of all required analyses.
