WITHLACOOCHEE RIVER WATER MEETS WATER QUALITY STANDARDS

Contact:

DOH-Madison

Lisa Hayes

Lisa.Hayes@flhealth.gov

Madison, FL – The Florida Department of Health (DOH), along with the Florida Department of Environmental Protection and Suwannee River Water Management District, have been reviewing water results from sampling in Georgia and the Florida Department of Health in Madison County collected samples in Florida along with Withlacoochee River, which flows into the Florida Suwannee River. All the samples near and in Florida have met Florida’s water quality standards since last Thursday.

DOH, the Florida Department of Environmental Protection and Suwannee River Water Management District are continuing to work together to closely monitor the situation as Valdosta continues to sample and post results to their website.

All future sample results can be viewed on the Florida Department of Environmental Protection site: floridadep.gov/dear/watershed-monitoring-section/content/suwannee-river-basin-sampling-locations.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.
