Executive Summary	1
Introduction.....	1
Background.....	1
Project Screening Process	2
Short-Listed Alternatives	3
Next Steps.....	5
1.0 Drivers and Goals for This Evaluation	1-1
2.0 Process and Methodology Overview	2-1
3.0 Candidate Water Sources.....	3-1
4.0 Candidate Recharge Areas and Methods	4-1
4.1 Target Recharge Area	4-1
4.2 Available Recharge Methods.....	4-3
4.3 Conceptual Routing to Recharge Sites	4-5
5.0 Screening Processes and Results	5-1
5.1 Tier One Screening: Low Value or Excessive Cost	5-1
5.2 Tier Two Screening: Capital Cost and MFL Benefit.....	5-2
5.3 Tier Three Screening.....	5-4
5.3.1 Additional Technical Analysis.....	5-4
5.3.2 Scorecard Evaluation	5-10
6.0 Recommendations	6-1
6.1 Recommended Projects for further Feasibility Assessment	6-1
6.2 Descriptions and Summary Assessments of Projects Recommended for Further Study.....	6-1
6.2.1 Description of Final Alternatives.....	6-1
6.2.2 Observations and Discussion	6-3
6.3 Next Steps.....	6-4
Technical feasibility studies of selected alternatives.....	6-4
Comprehensive evaluation of potential recharge sites	6-5
Environmental and permitting considerations	6-5
Refinement of potential project costs	6-5
Initiate discussions regarding governance options and cooperative agreements	6-6
Identify and pursue options for project funding	6-6
6.4 Project Fact Sheets	6-6
