

## Figures

Figure ES.1 Source Water, Treatment, and Recharge Constraints .....	2
Figure 2.1 Source Water, Treatment, and Recharge Constraints .....	2-1
Figure 2.2 Three Tiered Screening Process for Alternative Recharge Concepts.....	2-2
Figure 3.1 All Water Sources Considered.....	3-1
Figure 4.1 Influence of Recharge on the Santa Fe (Upper) and Ichetucknee (Lower) MFL Gauges .....	4-2
Figure 4.2 Conceptual Recharge Areas .....	4-3
Figure 5.1 Unit Conveyance Cost Screening Factor .....	5-1
Figure 5.2 Histogram of 32 Representative Alternatives Based on \$M per MGD of MFL Benefit .....	5-2
Figure 5.3 High Value Projects .....	5-3
Figure 5.4 Flow Availability from Lower Suwannee at Branford .....	5-6
Figure 5.5 Flow Availability from North Fork Black Creek .....	5-6
Figure 5.6 Project Scorecard for Tier 3 .....	5-11
Figure 6.1 Four Alternatives Recommended for Further Study.....	6-2

## Tables

Table ES.1 Proposed Lower Santa Fe and Ichetucknee Rivers MFL Recovery and Prevention Goals .....	2
Table ES.2 Summary of Short-Listed Alternatives.....	4
Table 1.1 Proposed Ichetucknee and Lower Santa Fe Rivers MFL Recovery and Prevention Goals .....	1-2
Table 2.1 Workshops with Sponsor Organizations .....	2-3
Table 3.1 Original List of Candidate Sources of Recharge Water .....	3-2
Table 5.1 Candidate Projects from Tier 2 Screening.....	5-4
Table 5.2 Treatment Process Assumptions for Best Case and Worst Case Scenarios .....	5-8
Table 5.3 Treatment Method Details.....	5-9
Table 5.4 Scorecard Criteria ( <i>Interpretation of Scorecard Columns</i> ) .....	5-10
Table 6.1 Alternatives Recommended for Further Study .....	6-1
Table 6.2 Comparative Results for Ocean Desalination Alternatives .....	6-1
