

INNOVATIVE AND EFFECTIVE UTILITY MANAGEMENT

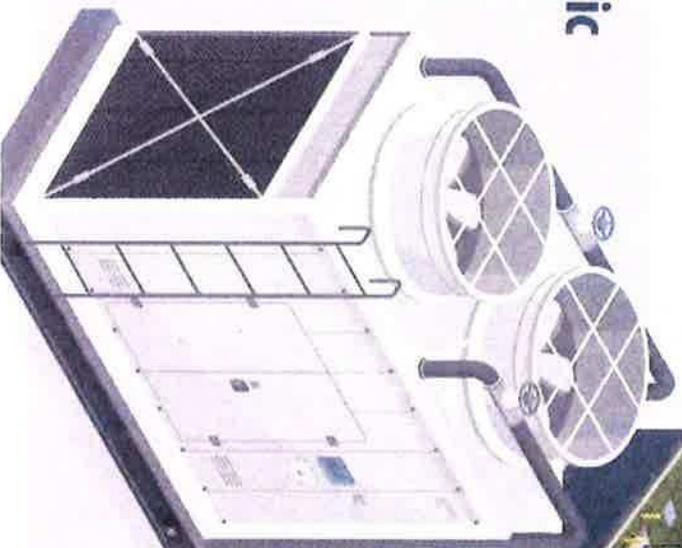

We partnered with state and local utilities to create innovative solutions that preserve the environment, while advancing the development of next-generation, technology-driven data centers.

Building will use only domestic water and sewer.

Standard utility services provided by Irwin County for buildings and developments.

Closed loop cooling minimizes water usage

Closed-loop air conditioning in data centers recycles cooled air to maintain precise conditions, reducing costs, improving reliability, and supporting sustainable, mission-critical operations.
