

What about SB 64? Where should JEA Buckman treated wastewater go?

Within the St. Johns River Water Management District:

- East of US 301, which follows Trail Ridge (TR) north to south,
- numerous lakes large and small seriously depleted for 30 years.
- Send that treated wastewater to those lakes.
- Much shorter pipelines.
- And Jacksonville wells can suck that water back up, not across TR.
- If it's good enough quality to send to the Suwannee Basin,
- it's good enough to send to wetlands in the St. Johns Basin.

Thanks to Ken Sulak for this idea, and for the following two maps.
