

Additional Measures:

- (1) Indoor uses shall reduce use by employing water conservation measures and by installing water conserving devices.
- (2) Essential uses may voluntarily reduce water use by limiting flushing and other system cleaning activities to a level required to maintain the health, safety, and welfare of the public.
- (3) Agricultural uses.
 - (a) Treated wastewater irrigation shall not be restricted;
 - (b) Low pressure/low volume irrigation systems shall not be restricted except in accordance with subsection 40B-21.601(1), F.A.C.;
 - (c) Flood/seepage irrigation systems shall be operated in a manner that will capture all runoff that is practicable for reuse;
 - (d) Hand watering shall not be restricted;
 - (e) The District shall request that livestock water users voluntarily reduce their water usage;
 - (f) Water use for freeze protection shall be restricted to situations in which official weather forecasting services predict temperatures likely to cause permanent damage to crops;
 - (g) Soil flooding for pest control or soil preservation shall be prohibited. Soil flooding to permit harvesting of sod shall be prohibited;
 - (h) The District shall request that aquaculture water users voluntarily reduce their water usage;
 - (i) All irrigation systems shall be operated in a manner that will efficiently use the water withdrawn;
 - (j) All agricultural enterprises should reduce or suspend those activities which stimulate the need for increased irrigation, as feasible and appropriate;
 - (k) No unnecessary off-site discharge from irrigation shall be allowed;
 - (l) Users having access to more than one source class shall maximize the use of the lesser or least restricted source class;
 - (m) For those agricultural enterprises that have best management practices approved by the Department of Agriculture and Consumer Services, irrigation for purposes of watering-in of insecticides, fungicides, herbicides, and fertilizers shall not be restricted. Such watering-in shall be limited to the minimum necessary and shall be accomplished during the hours allowed for normal irrigation.
- (4) Commercial and industrial uses.
 - (a) Phosphate mining and beneficiation operations:
 1. Recycled water within the mine site shall be used as much as possible to reduce freshwater withdrawals.
 2. Water within noncontiguous mine cuts and other impoundments shall be used to the greatest extent practicable to augment the mine's circulation system.
 3. Off-site discharges of water shall be reduced or eliminated to the greatest extent possible.
 4. Cleaning requiring water use shall be reduced to the minimum required to protect the efficiency of the operation, prevent damage to equipment, or maintain the health and safety of workers.
 5. Reduce or suspend the washing of vehicles except for health and safety needs.
 6. Nonessential uses, plant cleaning, water-cooled air conditioning, and lawn irrigation shall be reduced or eliminated to the greatest extent possible.
 - (b) Chemical products processing or manufacturing facilities:
 1. The use of fresh water shall be reduced to the greatest extent possible.
 2. Off-site discharge shall be reduced or eliminated to the greatest extent possible.
 3. Recycled water shall be used to replace fresh water to the greatest extent possible.
 4. Nonessential uses, plant cleaning, water-cooled air conditioning, and lawn irrigation shall be reduced or eliminated to the greatest extent possible.
 - (c) Limestone, sand, gravel, or other minerals mining operations:
 1. On-site impounded surface waters shall be used to replace fresh water withdrawals to the greatest extent possible.
 2. Reduce spraying for dust control in quarry area except for health and safety standards.
