

# Responsibilities of Public Water Systems under a Drought Response Level 1

- Public water systems are required to conduct a public information campaign to explain drought conditions and the need to conserve water.
- The campaign shall include one or more of the following: newspaper advertisements, bill inserts, website homepage, social media and notices in public libraries.
- It should target all commercial and residential water use, not just outdoor watering.
- It should emphasize what customers should do to be good stewards of our water resources.
