Do you believe your jurisdiction will be affected by the proposed development? Yes No
Please describe the expected impacts (positive and negative) on your jurisdiction.

Absolutely against this - data centers do not belong in rural farm areas. Nor do they need to take water out of the natural cycles as we already are in drought - even a "closed loop" removes water permanently from our water table. The damage of noise pollution is real - and the benefit is not to the community that will face health risks - noise pollution - and loss of agriculture in our communities. The grid (electric) can not support this use & forcing residents to pay for new infrastructure will increase our already inflated electric bills. Just Say No!
